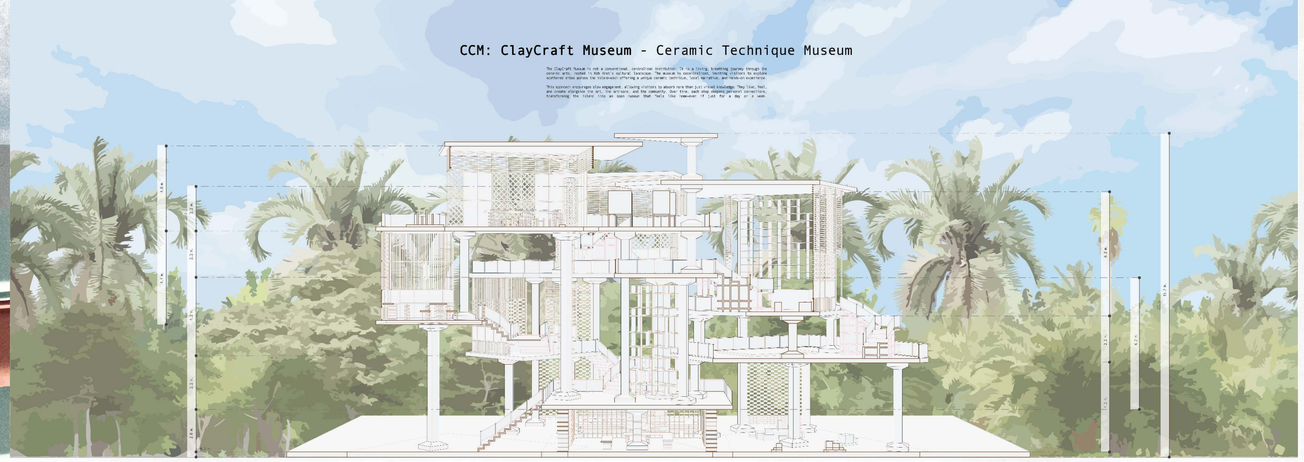
CCM: ClayCraft Museum - Ceramic Technique Museum

The ClayCraft Museum is not a conventional, reverential institution. It is a living, breathing journey through the ceramic arts, rooted in Koh Kret's cultural landscape. The museum is deconstructive, inverting visitors to explore multifaceted ethos across the Sitalakmuseum offering a unique ceramic technique, local narratives, and hands-on experience.

This approach encourages active engagement, allowing visitors to absorb more than just cultural knowledge. They live, feel, and experience the essence of ceramics, fostering a deeper connection to the craft and its significance in shaping and transforming the island. Thus, we have named them "Potty Time Commander." It can be a day or a week.



In the heart of Koh Kret, in its center stands our note partitioning hub for exhibitions, workshops, and ceramic collections Plan allows for intimate, hands-on experiences. Nestled between the Chao Phraya River and Bang Kruai Canal, it's a unique destination for artisans. Nature's ceramic might stems from all regions. From shops pour our praises with guidance from local artisans.

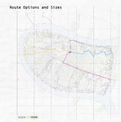
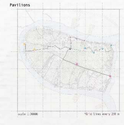
Route Options and Sizes



The 'Island Journey' is divided into four main routes, beginning at three key points: Sao Thong Hin Pier, Wat Pak Kret Pier, and Nonthaburi Pier on the Chao Phraya River. All routes have as their destination the **CCM: ClayCraft Museum**, located at its center of the island. Each route is designed to be unique, with no two visits, even if visitors take a new lane to start their starting pier. Lanes each route varies in width, from 3 meters to 5 meters, with walking paths in bicycles or buggies.

- 1: Only walking
- 2: Walking and Cycling
- 3: Walking, Cycling and Buggies
- 4: Walking, Cycling and Buggies

Partitions



Each route has different types of access, as the visit partitions are **designed to match the needs of visitors**. Each route has a unique mix of walking and bicycle and buggies, with partitions placed every 200 meters. Routes that allow bicycles have wider paths to accommodate two-way traffic, while routes accessible by buggies include larger rest areas every 1 kilometer. These variations ensure that the journey is tailored to each mode, with placed stopping points throughout the journey, tailored to the scale and rhythm of each mode.

- 1: 5x5 m partitions
- 2: 7x7 m partitions
- 3: 9x9 m partitions
- 4: 9x9 m partitions

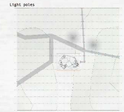
Light poles



The newly designed light poles are tailored to **blend seamlessly with the island's character**, both with unique crafted brick arrangements to decorative patterns. Each pole is designed to be 4 meters tall, with its aesthetic of the landscape. At the top, a solar panel is integrated to power the light, ensuring the poles not only functionals are visually pleasing but also environmentally friendly. Solar panels are installed every 10 meters along the main routes, enhancing both safety and environmental balance for all two and foreign.
