

# GRAFFLOW

*Grafflow* brings the out-standing point of graffiti, arrow, it blends harmoniously with color and abstract shape. It analyzes the direction and creates unexpected patterns, wonderful curves and surfaces by using the artistic technique, hydro dipping. The exterior of the model is inspired from the cut and uncut shape from hydro-dipping technique. Additionally, the interior uses several methods and design processes such as rebuilding and simplifying curves and adjusting. Finally, design it with triangular surfaces which refers to arrows which is the starting point.
