

-Concept

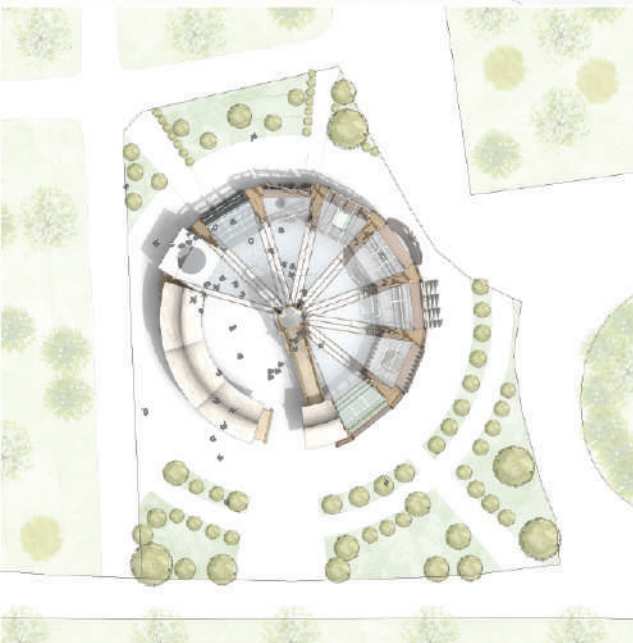

The Thai Spirit Pavilion celebrates the spiritual significance of Thai festivals through manifestations of Thai festivals into interactive spaces. The spaces were treated as devices used to communicate with visitors the atmosphere and activities of each festival through colors, facade designs, and form. Festivals in Thailand were directly related to weather and its impact on the community, which directly corresponds to the activities inside of the festivals and the belief in the never-ending cycle of festive activities.

-Function

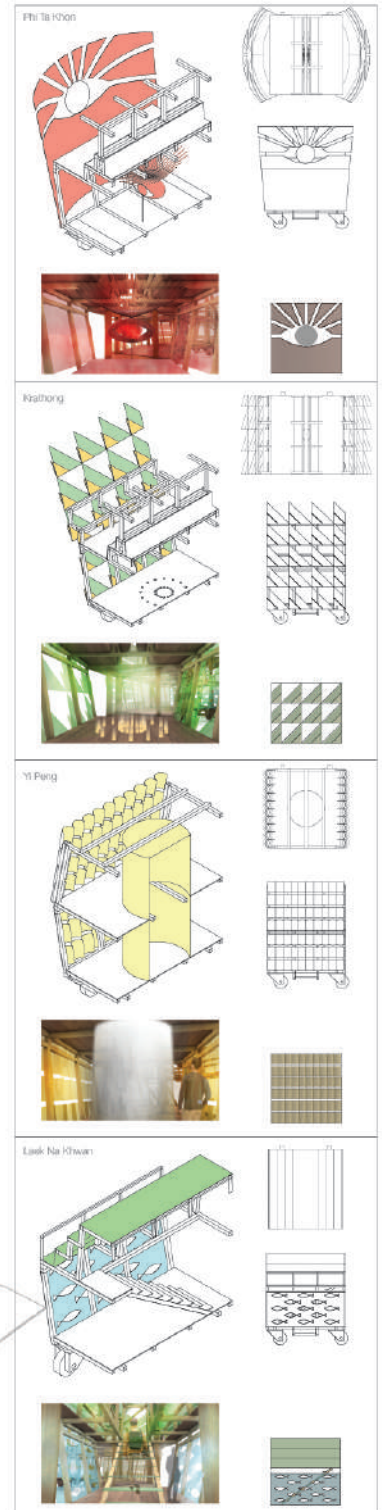

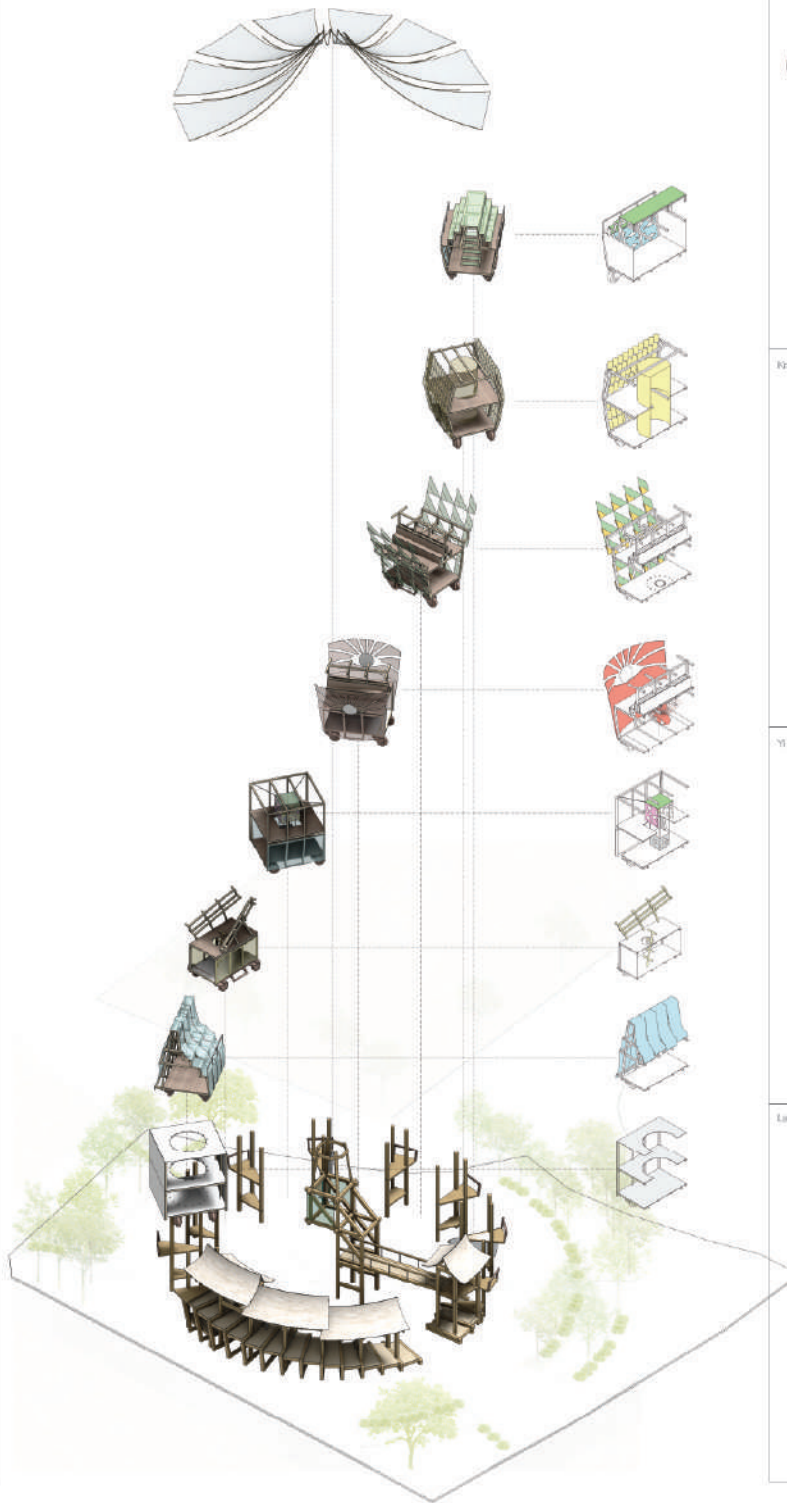

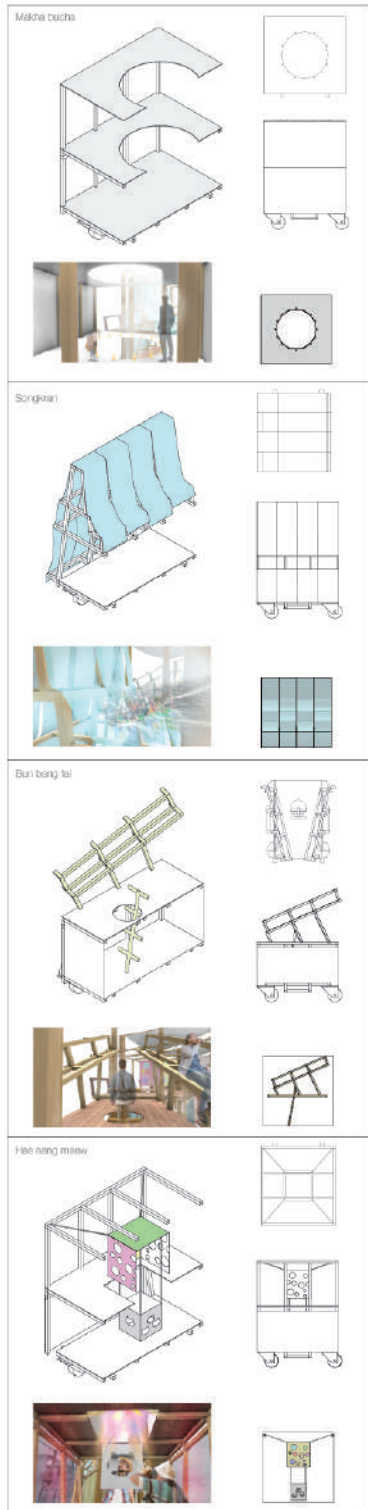

Pavilion with Interactive and mobile device showcasing representations of Thai elements into architectural designs.
