

BREATH OF SPEED REST STOP MUSEUM

The project critiques the dominance of speed and the environmental impact of the automotive industry, including pollution and energy overuse. Set within a green rest area, the museum offers a moment of pause, inviting visitors to slow down, reflect, and reconnect with nature. Inside, a series of immersive rooms explore themes of speed and pollution through sensory and visual experiences. Each space encourages reflection on how these forces shape daily life, aiming to raise awareness and spark meaningful dialogue.
