

Urban Oasis Thong Lo, Willy Phatchawin Tangtorgit

Urban Oasis Thong Lo

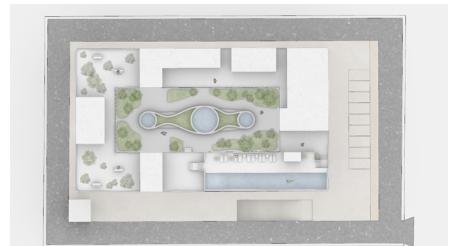

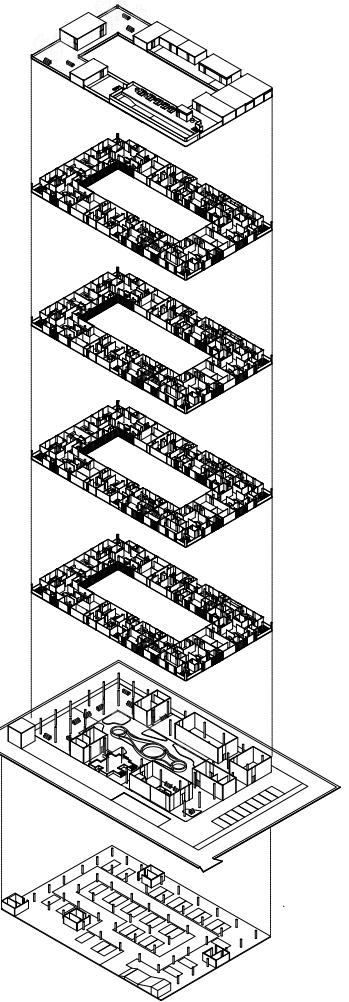

This project is designed to redefine urban luxury living by integrating high-end wellness facilities and abundant greenery within the bustling district of Thong Lo, Bangkok. Recognizing the challenges of urban living—such as noise, pollution, and a lack of green spaces—this project seeks to create a serene oasis for its residents and visitors while contributing positively to the surrounding community.

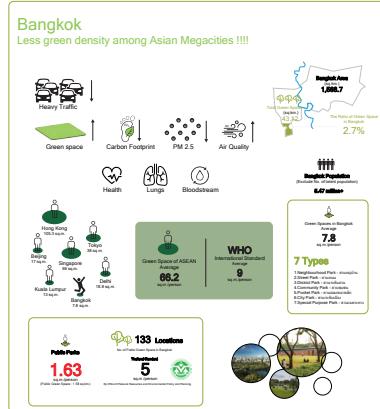

The ground floor features dining and cafe zones that are open to the public, fostering community engagement and offering a relaxing space for socializing. These zones are surrounded by lush greenery, creating a peaceful environment and enhancing air quality in an area that is often dominated by noise and carbon emissions. The greenery is thoughtfully designed to absorb carbon dioxide and provide natural insulation, improving the environmental conditions for both residents and neighbors.

The top floor is dedicated to luxury wellness facilities, including a swimming pool, fitness center, spa, sauna, and gender-specific changing rooms with lockers. These spaces are inspired by the luxurious amenities of iconic buildings like La Petite Afrique, offering a sanctuary of health and relaxation for users.

Strategically located in a quieter part of Sukhumvit Soi 55, away from the main street's chaos, the project combines exclusivity with accessibility. Its design emphasizes sustainability and functionality, with carefully selected materials such as white concrete and brown marble to convey elegance and durability.

Ultimately, the project aims to set a new standard for high-end urban living by prioritizing greenery, wellness, and community integration, providing a harmonious escape in the heart of Bangkok.
